In continuation of my telegram dated the 4th January 1943, I have the honour to submit the following report on the present position of sugar production at Hospet.

2. The total area under sugarcane during the current year in the Hospet notified area is 4,537 acres consisting of 1,816 acres under local varieties and 2,721 acres under foreign varieties. Of this area, about 768 acres are not likely to be available for the factory for want of transport facilities. About 500 acres are required for seed for the next crop and about 1,200 acres have already been crushed for jaggery making. Therefore the area on which the factory could depend at present, provided all crushing for jaggery making is at once stopped, is 2,068 acres. The crop is somewhat poor this year due to the adverse seasonal conditions and the average yield of cane per acre expected is not much above 17 tons. At this rate, the quantity of cane available is only about 35,000 tons against the normal requirements of 40,000 tons by the factory in a year of 100 crushing days at the rate of 400 tons per day. The factory can work up to 500 tons per day if necessary.

3. In former years the cultivators in the notified area depended mainly on the factory to purchase their cane but they took to jaggery manufacture on a large scale this year for the following reasons:-

(1) At the time when crushing was commenced in October last, jaggery was selling at an abnormally high rate as compared with sugar and the factory expressed inability to purchase cane at the rate the cultivator obtained by converting it into jaggery. The factory could not offer more than Rs.13/- per ton of cane while by converting cane into jaggery the cultivator got a net return of Rs.20/- to Rs.25/- per ton of cane. The rate at which jaggery of average quality sold at Hospet yesterday was Rs.28/- per Heru: (1 Heru = 9 local maunds:) which is equivalent to one ton of cane. The cost of making a Heru of jaggery is Rs.7/- at the most and the net return per ton was therefore Rs.21/-.

(2) In the notified area most of the sugarcane cultivators are tenant farmers. About 25% of the sugarcane lands belong to absentee landlords who live outside Hospet and the rest to the people in Hospet. The absentee landlords lease their lands at so many rupees per annum per acre and there is no difficulty with them. In the case of the other landlords, the lease is in terms of so much jaggery per acre per annum, the quantity varying from 4 to 10 Herus per acre according to the situation and nature of the land. The landlords insisted on the lease being paid this year in terms of jaggery though in previous years they accepted cane for their share. The conversion of cane into jaggery suited also the cultivators as they could get by this conversion over Rs.20/- per ton as against Rs.13/- offered by the factory.

(3) The demand for jaggery of every kind is unprecedented and a large quantity of it is still going out of the district.

(4) The Managing Director died suddenly and the cultivators did not know with whom they should negotiate for the sale of their cane.

4. In view of these reasons the cultivators thought it advisable to start jaggery making as early as possible instead of depending on the factory. Accordingly, they started crushing ratoon cane on the 11th October with 30 bullock crushers. There are about 165 bullock crushers and 8 power crushers working now and the quantity of cane crushed by them is not less than 400 tons per day. The cultivators are not particularly anxious to sell their cane to the factory at any rate lower than Rs.20/- per ton and unless, therefore, necessary steps are immediately taken by Government to counteract the high

In continuation of my telegram dated the 4th January 1943, I have the honour to submit the following report on the present position of sugar production at Hospet.

2. The total area under sugarcane during the current year in the Hospet notified area is 4,537 acres consisting of 1,816 acres under local varieties and 2,721 acres under foreign varieties. Of this area, about 768 acres are not likely to be available for the factory for want of transport facilities. About 500 acres are required for seed for the next crop and about 1,200 acres have already been crushed for jaggery making. Therefore the area on which the factory could depend at present, provided all crushing for jaggery making is at once stopped, is 2,068 acres. The crop is somewhat poor this year due to the adverse seasonal conditions and the average yield of cane per acre expected is not much above 17 tons. At this rate, the quantity of cane available is only about 35,000 tons against the normal requirements of 40,000 tons by the factory in a year of 100 crushing days at the rate of 400 tons per day. The factory can work up to 500 tons per day if necessary.

3. In former years the cultivators in the notified area depended mainly on the factory to purchase their cane but they took to jaggery manufacture on a large scale this year for the following reasons:-

(1) At the time when crushing was commenced in October last, jaggery was selling at an abnormally high rate as compared with sugar and the factory expressed inability to purchase cane at the rate the cultivator obtained by converting it into jaggery. The factory could not offer more than Rs.13/- per ton of cane while by converting cane into jaggery the cultivator got a net return of Rs.20/- to Rs.25/- per ton of cane. The rate at which jaggery of average quality sold at Hospet yesterday was Rs.28/- per Heru: (1 Heru = 9 local maunds:) which is equivalent to one ton of cane. The cost of making a Heru of jaggery is Rs.7/- at the most and the net return per ton was therefore Rs.21/-.

(2) In the notified area most of the sugarcane cultivators are tenant farmers. About 25% of the sugarcane lands belong to absentee landlords who live outside Hospet and the rest to the people in Hospet. The absentee landlords lease their lands at so many rupees per annum per acre and there is no difficulty with them. In the case of the other landlords, the lease is in terms of so much jaggery per acre per annum, the quantity varying from 4 to 10 Herus per acre according to the situation and nature of the land. The landlords insisted on the lease being paid this year in terms of jaggery though in previous years they accepted cane for their share. The conversion of cane into jaggery suited also the cultivators as they could get by this conversion over Rs.20/- per ton as against Rs.13/- offered by the factory.

(3) The demand for jaggery of every kind is unprecedented and a large quantity of it is still going out of the district.

(4) The Managing Director died suddenly and the cultivators did not know with whom they should negotiate for the sale of their cane.

4. In view of these reasons the cultivators thought it advisable to start jaggery making as early as possible instead of depending on the factory. Accordingly, they started crushing ratoon cane on the 11th October with 30 bullock crushers. There are about 165 bullock crushers and 8 power crushers working now and the quantity of cane crushed by them is not less than 400 tons per day. The cultivators are not particularly anxious to sell their cane to the factory at any rate lower than Rs.20/- per ton and unless, therefore, necessary steps are immediately taken by Government to counteract the high

prices of jaggery there is not much possibility of the sugar factory working this year for more than a few days even at the increased rate of sugar. I should like to suggest the following steps to discourage jaggery making:-

(1) The maximum price of jaggery should be fixed immediately at Rs.20/- per Heru of 9 maunds.

(2) There should be strictest control possible to prevent jaggery being transported by road and rail into the Mysore and Hyderabad States and also into Bombay Presidency. This is not an easy task as a man taking in a cart 5-6 Herus of jaggery can easily afford to bribe the watchmen up to Rs.10 to 15/- for allowing him to enter the territory adjoining the Bellary district.

(3) The factory should pay at Rs.16/- per ton of foreign varieties and Rs.15-6-0 per ton of local varieties of cane on the same basis as already notified by Government, with the proviso that if the price of sugar is raised above Rs.380/- per ton the cultivators should be paid bonus at the rate already announced.

(4) Further crushing for jaggery making should be immediately stopped under the provisions of Emergency Act in villages included in the notified area.

5. If the first three recommendations are accepted and rigidly enforced, it may not be necessary to give effect to the recommendation No.(4).

6. The Secretary to the sugar factory has given me an undertaking to pay for the cane at the rates mentioned above as long as sugar recovery is not less than 9% and for the rest in proportion to the percentage of sugar obtained. The latter condition is unnecessary at present and it is enough if the price is fixed as mentioned above.

7. The villages included in the notified area and the area grown with sugarcane in each village is given below:-

Name of village	Local variety.	Co.Varieties.
	Acres.	Acres.
Chitwadigi	42.11	274.75
Mudlapur	93.00	410.00

Sir,

Ref:- Government Memorandum No. 24450-A/42-4 dated the 28th November 1942.

In continuation of my telegram dated the 4th January 1943, I have the honour to submit the following report on the present position of sugar production at Hospet.

*Copy enclosed.

2. The total area under sugarcane during the current year in the Hospet notified area is 4,537 acres consisting of 1,816 acres under local varieties and 2,721 acres under foreign varieties. Of this area, about 768 acres are not likely to be available for the factory for want of transport facilities. About 500 acres are required for seed for the next crop and about 1,200 acres have already been crushed for jaggery making. Therefore the area on which the factory could depend at present, provided all crushing for jaggery making is at once stopped, is 2,068 acres. The crop is somewhat poor this year due to the adverse seasonal conditions and the average yield of cane per acre expected is not much above 17 tons. At this rate, the quantity of cane available is only about 35,000 tons against the normal requirements of 40,000 tons by the factory in a year of

100 crushing days at the rate of 400 tons per day. The factory can work up to 500 tons per day if necessary.

3. In former years the cultivators in the notified area depended mainly on the factory to purchase their cane but they took to jaggery manufacture on a large scale this year for the following reasons:-

(1). At the time when crushing was commenced in October last, jaggery was selling at an abnormally high rate as compared with sugar and the factory expressed inability to purchase cane at the rate the cultivator obtained by converting it into jaggery. The factory could not offer more than Rs.13/- per ton of cane while by converting cane into jaggery the cultivator got a net return of Rs.20/- to Rs.25/- per ton of cane. The rate at which jaggery of average quality sold at Hospet yesterday was Rs.28/- per Heru(1 Heru = 9 local maunds) which is equivalent to one ton of cane. The cost of making a Heru of jaggery is Rs.7/- at the most and the net return per ton was therefore Rs.21/-.

(2). In the notified area most of the sugarcane cultivators are tenant farmers. About 25 % of the sugarcane lands belong to absentee landlords who live outside Hospet and the rest to the people in Hospet. The absentee landlords lease their lands at so many rupees per annum per acre and there is no difficulty with them. In the case of the other landlords, the lease is in terms of so much jaggery per acre per annum, the quantity varying from 4 to 10 Herus per acre according to the situation and nature of the land. The landlords insisted on the lease being paid this year in terms of jaggery though in previous years they accepted cane for their share. and the conversion of cane into jaggery suited also the cultivators as they could get by this conversion over Rs.20/- per ton as against Rs.13/- offered by the factory.

(3). The demand for jaggery of every kind is unprecedented and a large quantity of it is still going out of the district.

(4). The Managing Director died suddenly and the cultivators did not know with whom they should negotiate for the sale of their cane.

4. In view of these reasons the cultivators thought it advisable to start jaggery making as early as possible instead of depending on the factory. Accordingly, they started crushing ratoon cane on the 11th October with 30 bullock crushers. There are about 165 bullock crushers and 8 power crushers working now and the quantity of cane crushed by them is not less than 400 tons per day. The cultivators are not particularly anxious to sell their cane to the factory at any rate lower than Rs.20/- per ton and unless, therefore, necessary steps are immediately taken by Government to counteract the high prices of jaggery, there is not much possibility of the sugar factory working this year for more than a few days even at the increased rate of sugar. I should like to suggest the following steps to discourage jaggery making:-

(1). The maximum price of jaggery should be fixed immediately at Rs.20/- per Heru of 9 maunds.

(2). There should be strictest control possible to prevent jaggery being transported by road and rail into the Mysore and Hyderabad States and also into Bombay Presidency. This is not an easy task as a man taking in a cart 5-6 Herus of jaggery, can easily afford to

bribe the watchmen up to Rs.10 to 15/- for allowing him to enter the territory adjoining the Bellary district.

(3). The factory should pay at Rs.16/- per ton of foreign varieties and Rs.15-6-0 per ton of local varieties of cane on the same basis as already notified by Government, with the proviso that if the price of sugar is raised above Rs.380/- per ton the cultivators should be paid bonus at the rate already announced.

(4). Further crushing for jaggery making should be immediately stopped under the provisions of Emergency Act in villages included in the notified area.

5. If the first three recommendations are accepted and rigidly enforced, it may not be necessary to give effect to the recommendation No.(4).

6. The Secretary to the sugar factory has given me an undertaking to pay for the cane at the rates mentioned above as long as sugar recovery is not less than 9 % and for the rest in proportion to the percentage of sugar obtained. The latter condition is unnecessary at present and it is enough if the price is fixed as mentioned above.

Civil Supplies – Jaggery – Manufacture – Hospet area – Control.

A copy of letter no. C.2.1362-42 dt. 5-1-43 from the D.A. is forwarded to the Bd of Rev (C.S).

2. The Bd of Rev (CS) is requested to offer its remarks urgently on the D.A's suggestions to control the price of jaggery and to prohibit the crushing of cane for jaggery manufacture in the Hospet area.

3 The Bd of Rev (C.S) is requested not to issue any permit for the export of jaggery from the Bellary Dt., without the orders of the Govt., in view of the situation reported by the D.A.

To the Bd of Rev (C.S).
(with copy of pp 3-4 ante)

Memo no.

Civil Supplies – Jaggery. Hospet area – Control

It is reported that due to the unprecedented demand for jaggery a large quantity of jaggery is going out of the Bellary Dt. from Hyderabad states, and Bombay Province has pushed up the price of jaggery and the cultivators of sugarcane have taken to jaggery manufacture instead of supplying the cane for sugar manufacture. The export of jaggery to places outside the Pro-

is prohibited except under permits issued by the C.C.S Madras. He is being requested not to issue permits for export of jaggery from the Bellary district. The Collector is requested to take effective steps to prevent illegal export of jaggery from the Dt.

To the Collector of Bellary
Copy to the Bd of Rev (CS)

MEMORANDUM No. 338 J/43-2 dated 8-1-1943.

CIVIL SUPPLIES – Jaggery – Hospet area – Control.

The attention of the Collector of Bellary is drawn to G.O.No.M.288,Dev., dated 5th Septr.1942 as amended by G.O.No.M.427 Dev., dated 15th Octr.1942 and G.O.No. M.642 Dev., dated 21st Decr.1942. Under the existing orders, transport of jaggery is prohibited from any place in Madras Province to any place outside it except under permit issued by the Commr. of Civil Supplies, subject to the two provisos contained in the G.O. first cited. The Director of Agriculture has now reported that the ban on transport of jaggery without permit has not been enforced as it should be in the district of Bellary and that large quantities of jaggery are going out of Bellary district by road and rail into Mysore and Hyderabad States and into Bombay Presidency. It has been reported that, as a result of this export of jaggery to places outside the Province, the price of jaggery has greatly increased in the Bellary area and that cultivators of sugarcane find it much more profitable to divert their cane to jaggery production instead of supplying cane for sugar manufacture. The Commr. of Civil Supplies has been requested not to issue any permit for the export of jaggery from the Bellary district without further orders in view of the situation reported by the Director of Agriculture. The Collector of Bellary is requested to take effective steps to prevent the illegal export of jaggery from the district and report the steps taken to the Govt. through the Bd of Rev.

To the Collr. of Bellary.
Copy to the Bd. of Rev. (C.S.).

D.O. no 338 T/43-1 dt 8-1-43

Dear Mr

Sub. Civil Supplies - Sugar - Price for cane in Hospet area.

Ref. From the D.A. no. C2. 1362-42 d. 5.1.43

I invite attention to paragraph 4 of the letter cited. Action is being taken in the Madras office on suggestions 1, 2 and 4 of the D.A. I understand that action is being taken in the Orissa office on suggestion 3 with reference to the D.A's telegram dt. 4.1.43. I am to add that the Govt. of India have advised a factory

prices for different grades of sugar. (Copy of G.O. No. 1 dated 1.8.43 enclosed). For an ex-factory price of Rs 3-8-0 per ton of sugar, the factory should be able to pay not less than Rs 16 per ton of cane. In view of this there seems no need for a sliding price scale for sugar cane in Hospet area. If Govt agree with this view a fixed price for Hospet cane as suggested by the D.A. may be ordered very urgently.

Civil Supplies – Jaggery. Export from Bellary

Dt. ✓

Govt. Memo. no. 338 J/42-1 of 8-1-43.

It is further understood that Considerable quantities of jaggery made in the Hospet area are being sent across the river into the Hyderabad territory where apparently there is a large demand. The Collector of Bellary is requested to report whether this is so and if so what has been done to stop it. He should send the report direct to the Govt. through the Bd. of Rev (CS) so as to reach the Govt. by 18.1.43.

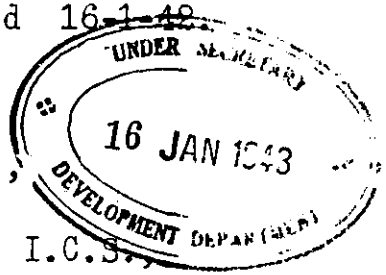
Civil Supplies - Jaggery - Manufacture - Hospet area - Control.

Ref. No.9589/C/42. (CS) Dated 16-1-43.



From

Sri.Rao Sahib P.V.Subba Rao M.A.,
Additional Joint Secretary,
Board of Revenue, (Civil Supplies),
Madras.

To

W.Scott Brown Esq., C.S.I., C.I.E., I.C.S.,
Commissioner of Civil Supplies.

Ref: Government Memo Special 338 J/42-1 Dev. dated 8-1-43.

The Board submits the following remarks on the letter of the Director of Agriculture No.C.2-1362/42 dated 5-1-43 communicated with the memorandum read above.

2. The Board has very little faith in controlling the price of jaggery per se even with a compact area and does not think that will work alone. The Board is quite certain that without an enormous preventive staff it shall not stop jaggery slipping over the borders. In view of the large amount of jaggery already produced in the area The Board put a ban on all further production in the area and serve notices on the individual power and bullocks drawn crushers. The only exception, if any, would be in particularly remote villages which can hardly bring their cane to the factory. As regards these, the Board thinks it would be necessary to fix the maximum jaggery price proposed, otherwise there would be an inducement to move cane to these villages.

villages.

3. So far as the action now necessary ~~is required~~ the Board would make crushing for jaggery illegal in the whole area and make the exceptions applicable only later after careful investigation of local conditions, difficulties of transport and exploration of stocks there and in other villages (accessible to the factory but also accessible to the villages which perhaps deserve exemption.)

4. The Sugar Controller has furbidden certain forms of productions till end of January and considering all the ~~lines~~ The Board does not think that the ban on further jaggery production here would be egregious. It is the only effective course.

5. Price for cane proposed is acceptable. The Board has no special comments on other matters.

~~Resolution~~ Order ~~Roll~~ Ms. No. 59, dated 22-1-43. 19____

On account of the high price of gaggery the Cane Cultivators in the Hospet area are reported to be Converting their Cane into gaggery instead of Supplying the Cane to the Sugar factory at Hospet. It is reported that the quantity of cane crushed by them is not less than 400 tons per day. At this rate the Sugar factory will get very little Cane and it will not be able to work for more than a few days. In view of the Serious Sugar Situation in the Province it is necessary to prevent this undesirable development. The Govt have therefore decided to prohibit the crushing of Cane for gaggery manufacture in the Hospet area.

2. Certain villages which cannot supply Cane to the factory due to transport difficulties will require exemption. The D.A is requested to submit a list of such villages after investigating local conditions

difficulties of transport and availability of stocks in those villages and in the villages (accessible to the factory but also accessible to the villages which require exemption). Pending such exemption this order will apply to all villages mentioned in the schedule to the notification

3 The notification appended to this order will be published in the T.S.S. Gazette.

Civil Supplies - Jaggery - Manufacture -
" Hospet area - Prohibition - Proposals

CDD 238 J/43 From the D.A. No. C.2 - 1362-42 dt 5-1-43.

Please See D.A's letter on pp 3-4 CF

The Hospet factory requires about 40,000 tons of cane in a year of 100 crushing days. The quantity of cane available in the Hospet area during the current year is about 35,000 tons. The D.A apprehends that there is the danger of the cane being diverted to jaggery manufacture and the factory becoming unable to work more than for a few days for want of cane, for the following reasons

from 2 + ½ 3 CF

from 2 of 3 CF

Due to the high price of jaggery the cultivator is able to get a net return of Rs 20 - to Rs 25/- per ton of cane instead of Rs 13/- per ton if they sold to the factory.

That most of the landlords, who leased their land have insisted on their rent being paid in terms of jaggery.

That the demand for jaggery of every kind has become unprecedented & that large quantities of jaggery are still going out of the Province.

from 4. pp 3-4 CF

It is reported that the cultivators started crushing cane for jaggery on 11th October & that there are about 165 bullock crushers and 8 power crushers now working, using up about less than 4000 tons of cane per day. To counteract this undesirable development he has suggested the following measures.

1. The fixing of the maximum price of jaggery at Rs 20/- per Khandi of 9 maunds
2. Stoppage of all exports into the States of Hyderabad & Mysore & the Province of Bombay.

3. the payment by the factory at Rs 16/- per ton of foreign varieties and Rs 15-8-0 of local varieties, and
4. Prohibition of Crushing Cane for jaggery making.

Proposal 1 above The Committee for Sugar Production at its last meeting decided that there was no case for Controlling the price of jaggery then and that the matter may be considered at subsequent meetings. But as the matter has become now very urgent, the Bd may perhaps be consulted. A & p. 1 of D.

Draft o.m. to Bd. below may be appd Gen

Proposal 2 above The export of jaggery to places outside the province is now prohibited except under a permit issued by the Dts Madras. The Dts may therefore be asked not to issue any permits for the export of jaggery from the Bellary Dt. The Collector may also be asked to keep a strict watch over illegal transport. p 2 of (C)

Draft o.m. below for appl. Gen

Proposal 3 above Action is being taken in A Section Separately. (Draft notification at I-C is confirmed the factory is bound to pay the prices fixed by the D.A for the ensuing season.) p 1 of (E) & 3 to 5

Proposal 4 above The Bd's remarks may be invited. The D.A has stated that if the proposals (1) to (3) are effectively enforced there may not be any necessity to give effect to the last proposal. (The D.A for an ex-factory sugar price of Rs 3 per ton.) See para 2 of (E) para 5, p 4 ante.

A draft memo to the Bd (Co) and a draft memo to the Collector of Bellary are submitted for approval

Proposal 3 - 9 shall write to D.S. about them. Two drafts for approval

Issued as Memo No 338 T/43-2 dated 13.1.43.

From the Board of Rev (CS) No 9589/ac (cs) dt 16.1.43

The Board of Rev (CS) was requested to offer its remarks
on the suggestions of the D A.

(1) To control the price of jaggery in Hospet area

(2) To prohibit the crushing of cane for jaggery
manufacture in the Hospet area.

The Bdg Rev is not in favour of the two

the price of jaggery. The Bd is however in favour of prohibiting the crushing of Cane for jaggery manufacture, in the Hospet area. It adds that although certain villages which cannot transport their Cane to the factory will have to be given exemption this may be considered in due course after thorough investigation. For the present the prohibition is to extend to the whole area

Dev

At the Sugar Production C'tee meeting to-day A 2 expressed a wish to see the G.O. below again. He observed that the order would be extremely difficult to enforce without special staff. When once certain villages had been exempted from the order, there was nothing to prevent the ryots from taking their ~~purchases~~ crushing machines to the exempted villages, along with their cane and doing the crushing there. The file may be circulated to A.2.
